- Flow-thru and immersion mounting
- High accuracy
- Stainless steel model with ½" GAS NPT external thread
- Glass version with high chemical resistance and PG 13.5 external th

HI 7610 and HI 7611 are temperature probes with 3-wire Pt100 or Pt1000 sensor. These probes provide accurate and effective temperature compensation. They are used with a vast array of industrial pH, ORP and conductivity controllers on the same as well as our pH 500, mV 600, HI 700 & HI 504 series.

HI 7610 and HI 7611 are constructed of stainless steel for additional ruggedness and incorporate ½" external threads on both ends to facilitate inline and immersion installations.

#### Specifications

#### Dimensions

Temperature Sensor	Pt1000
Body Material	stainless steel
Max Pressure	8 bar
Cable Length	5 m (16.4')
