- Flow-thru and immersion mounting
- High accuracy
- Glass body with high chemical resistance and PG 13.5 external thre

HI 7620 and HI 7621 are temperature probes with 3-wire Pt100 or Pt1000 sen
These probes provide accurate and effective temperature compensation. They
used with a vast array of industrial pH, ORP and conductivity controllers on the
as well as our pH 500, mV 600, HI 700 & HI 504 series.

HI 7620 and HI 7621 are made with a glass body in order to provide greater r
against aggressive chemicals. They also come with a standard PG 13.5 externa
that they may be used with our

HI 6054T holder as well as other common probe holders.

Specifications

Dimensions

| | |
|--------------------|-------------|
| Temperature Sensor | Pt1000 |
| Body Material | glass |
| Max Pressure | 3 bar |
| Cable Length | 5 m (16.4') |
